BudKicker is a concentrated liquid bio-catalyst. It acts as a nutrient, or "booster", for our microbial populations in Micro-Blaze® Emergency Liquid Spill Control when applied to long-term remediation projects.

BudKicker is also a plant and garden supplement. It is a natural, non-chemical solution designed to enhance plant growth. It activates the existing soil nutrients to create a stronger root system and better soil conditions.

Directions: Apply **BudKicker** in a 6% to 10% dilution with water.
