Using Micro-Blaze Out[®] FOG in Kitchens and Institutional Food Service Facilities

Micro-Blaze[®] F.O.G can be used as an effective, economical and ecologically safe floor cleaner in kitchen environments. Instead of harmful caustic chemicals, it is comprised of natural microbes that love to digest greases, fats and oils. This natural bio-formulation gives you more than a clean floor.

Take a look at the advantages of using **Micro-Blaze[®] F.O.G**:

- ***Safer Work Environment***

Eliminates slipping and sliding in the kitchen and dining room areas, resulting in fewer accident claims.

- ***Maintains Regulatory Compliance***

Helps maintain constant compliance with regulatory authorities such as the health departments, state environmental agencies, EPA, avoiding those large surcharges.

- ***Eliminates Odors and Stains***

Can be used on carpets and fabrics to remove the residue and odor of spills such a milk, vomit, pet urine, blood, wine, coffee, etc.

- ***Cleans Exteriors***

Cleans and deodorizes dumpster area, sidewalks and oil spots in the drive-thru area.

- ***Reduces Monthly Budget***

Micro-Blaze[®] F.O.G will take the place of most cleaning products. Daily use can help reduce your plumbing maintenance and pumping requirement for grease traps (depending on dirt and trash accumulation).

- ***Helps Save the Planet***

Contribute to the improvement of the local environment as this natural, ecologically safe cleanser is released into your city's main sewer lines.

- ***Tested and Certified by NSF International***

Micro-Blaze[®] F.O.G is certified for use as a general cleaner [A1], and as a floor and wall cleaner for use in all departments [A4].
