

FOR RV & HOME USE

VERDE ENVIRONMENTAL, INC.

HOME OF

"PARTNERING WITH NATURE FOR A CLEANER TOMORROW"

## Product Details

### Appearance:

Creamy off-white

### pH:

7.0 - 8.0

### Shelf Life:

5 Years

### Storage:

Store in closed containers at room temperature

### Packaging:

- Case: (6) 32 oz. Bottles
- 1-Gallon Refills

**Micro-Blaze® Septic** is an all-natural, microbial-based liquid formula that controls odors and treats portable toilet and septic systems. When applied, biological activators accelerate the breakdown of solids into smaller components, allowing the microbes in **Micro-Blaze® Septic** to digest the waste. It is biodegradable and contains no toxic chemicals or formaldehyde.

### Advantages:

- Single flush formula
- Non-toxic and biodegradable
- Keeps liquid level sensors clean
- No harsh chemicals or formaldehyde
- Digests proteins, oils, grease, and paper
- Eliminates odors and leaves a clean, fresh smell

**ALWAYS SHAKE WELL - SETTLEMENT OF MICROBES WILL OCCUR**

# DIRECTIONS FOR USE IN ALL SEPTIC SYSTEMS AND BLACK & GRAY WATER TANKS

## Home/Commercial Septic System

Remove cap and pour 8 oz of **Micro-Blaze® Septic** in 1 gallon of water and divide amongst toilets, sinks, showers, and all drains. Repeat application monthly.

## RV/Marine

Loosen cap over measuring chamber (do not completely remove cap) and gently squeeze until you have 1 oz (30ml) in the measuring chamber.

### Black Water Tank:

Remove cap and pour 1 oz of **Micro-Blaze® Septic** in the toilet bowl after filling the bowl about 1/3 full of water. Then brush and clean the bowl as normal and then flush. Do not use or add any other tank treatment or cleaning product.

### Gray Water Tank:

Remove cap and pour 1 oz of **Micro-Blaze® Septic** in a 6-8 oz cup of water and divide amongst shower and sinks.

If any odors return prior to performing a dump, then repeat the process by adding an additional 1 oz and repeat. Usually 1 oz or 2 oz will be all that is required prior to a dump. After dumping, the process will need to be performed again.

Note: When emptying tanks, always add 2-3 gallons of water to each tank prior to application of **Micro-Blaze® Septic**.

## Liquid Level Sensors

Frequently, black/gray water sensors get clogged with organics and cease to work properly. By taking the following steps when leaving the campground, **Micro-Blaze® Septic** can clean those sensors:

1. Dump the black/gray water tank as normal and then fill the tank to 1/2 to 2/3 full of water;
2. Add 1-2 oz of **Micro-Blaze® Septic** to the black/gray water tank, through the toilet for black tank, or sink for gray tank, as usual;
3. If possible, wait 1-2 days after applying the **Micro-Blaze® Septic** before dumping the tank.

By following these steps, the **Micro-Blaze® Septic** will splash around the black/gray tanks while driving home or to the next campground, causing the microbes to attach to and digest the organics, thereby cleaning the sensors.

# MICRO-BLAZE® SEPTIC

## A Multi-Purpose Cleaner & Deodorizer

### For the RV & Home

#### General Cleaning & Odor Control

**Micro-Blaze® Septic** will degrade any odor causing organics present in bathrooms and kitchens, thereby removing the odor and leaving a fresh, pleasant scent. (see Sprayer Bottle Dosage Instructions)

- **Bathrooms:** Spray around toilet bowl base, seat and cover; floors, sinks, and showers/baths
- **Kitchens:** Spray ovens, stovetops, counters, floors, and sinks

Allow **Micro-Blaze® Septic** to set before wiping clean.

#### Carpet, Clothing, & Fabric Stains

**Micro-Blaze® Septic** is excellent for spot treating organic stains caused by coffee/food, wine, urine, etc. Using the spray bottle (see Sprayer Bottle Dosage Instructions), follow these easy steps:

- **Carpet/Upholstery:** Spray the stained area and then use a brush/washcloth to work the solution into the stain. Allow the solution to set and then vacuum. Repeat if necessary.
- **Clothing/Fabric:** Spray the stain and then use a cloth to work the solution in to the stain. Allow the solution to set overnight and then wash the clothing in the washing machine as normal.

#### SPRAYER BOTTLE DOSAGE INSTRUCTIONS

Mix 1 oz of **Micro-Blaze® Septic** in a 24-32 oz hand-held sprayer bottle that has already been filled with water. Always shake as settlement of microbes will occur. Keep the diluted, ready-to-use spray bottle for multiple uses.

## Kitchen Vent Hoods & Filters

Kitchen vent hoods and filters in both the RV and home can become greasy over time. **Micro-Blaze® Septic** will clean the hoods and filters by following these steps:

1. Submerge the filters in warm water with 1 oz of **Micro-Blaze® Septic**, allow them to soak.
2. Rinse filters with water. Allow them to dry and put them back in place.
3. Spray the **Micro-Blaze® Septic** solution into the vent hood (see Sprayer Bottle Dosage Instructions). Allow the solution to set, then wipe clean.

## Pet Stains & Odors

Remove pet stains with **Micro-Blaze® Septic** by following the Carpet, Clothing, & Fabric Stain instructions on previous page. **Micro-Blaze® Septic** can also be sprayed on litter boxes and pet beds to remove unwanted odors.

# AREAS WHERE MICRO-BLAZE® MICROBIAL PRODUCTS CAN BE USED AROUND THE HOME

- Aquariums & Outdoor Ponds
- Boats / Marine
- Carpet Cleaning
- Concrete Stains
- Oven/Stove Cleaning (oils, grease, etc.)
- Lawn Care
- Odor Control from Spills
- Pet Stains
- RV Black & Gray Water Tanks
- Home Septic Systems
- Vomit, Urine, Feces Clean-up

## Other Micro-Blaze® Microbial Products:

Emergency Liquid Spill Control • FOG •  
Micro-Blaze Out® • AGRO • APT • Budkicker •  
CSR • Non-Formulated • Turf Care

## 2 SIZE OPTIONS:

- **Small Case: \$37.98**

(2) 32 oz Bottles + tax (shipping included)

- **Large Case: \$89.94**

(6) 32 oz Bottles + tax (shipping included)
